Lumaire Wayfinding System

Riga International Airport 

LUMAIRE
by LeddeX

Ultra Thin & Bright
LED light panels

The wayfinding system is designed for signage in public areas, especially at airports, railway stations, etc.

It is an ideal choice from both a technical and aesthetic point of view: light weight, low power consumption, slim and elegant design.

The panels are only 15 mm thick, whether they are single or double-sided. Their length can range from 12 cm to 5 meters.

CUSTOMISABLE

Variety of sizes: from 120 mm to 5000 mm

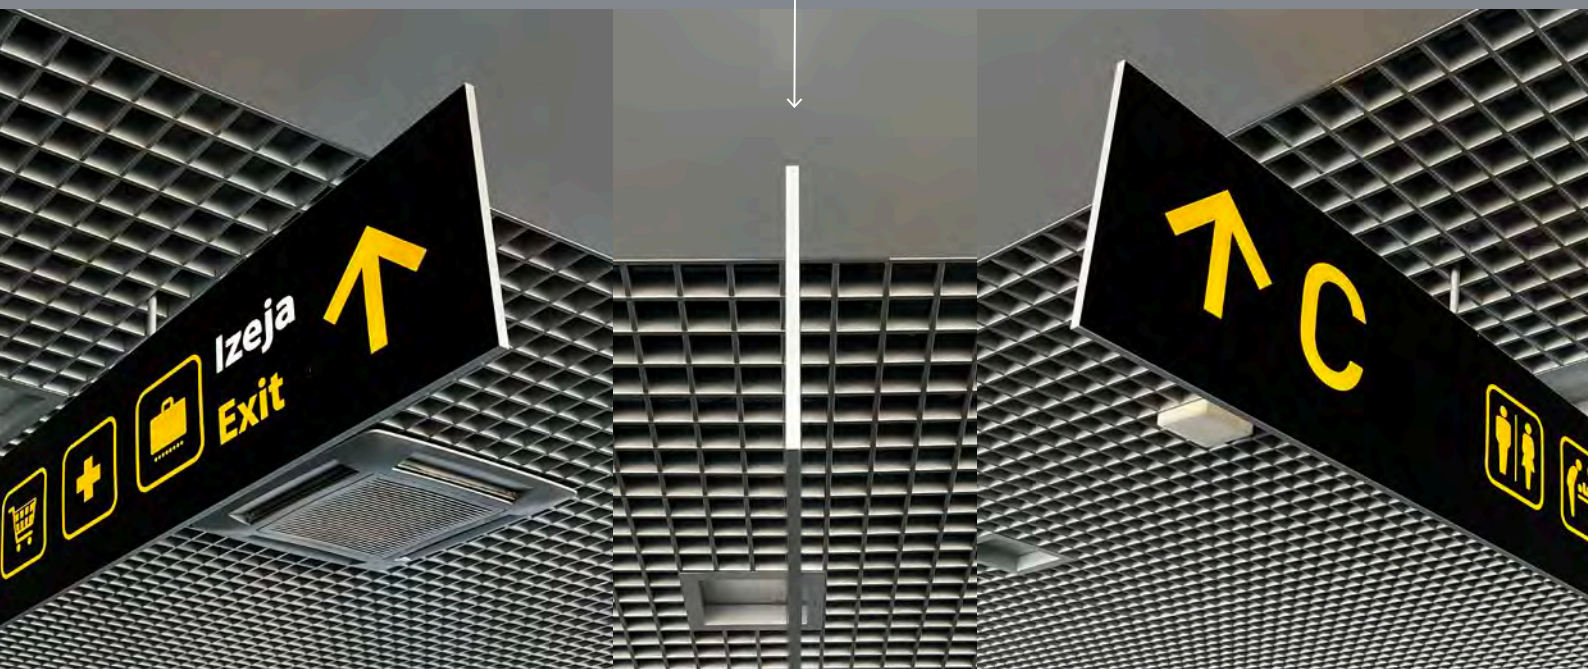

up to 5000 mm

SLIM & ELEGANT

Thickness – only 15 mm

15 mm

INFORMATIVE

Single or double-sided

ELEGANT DESIGN

High-quality materials combine well with other interior elements

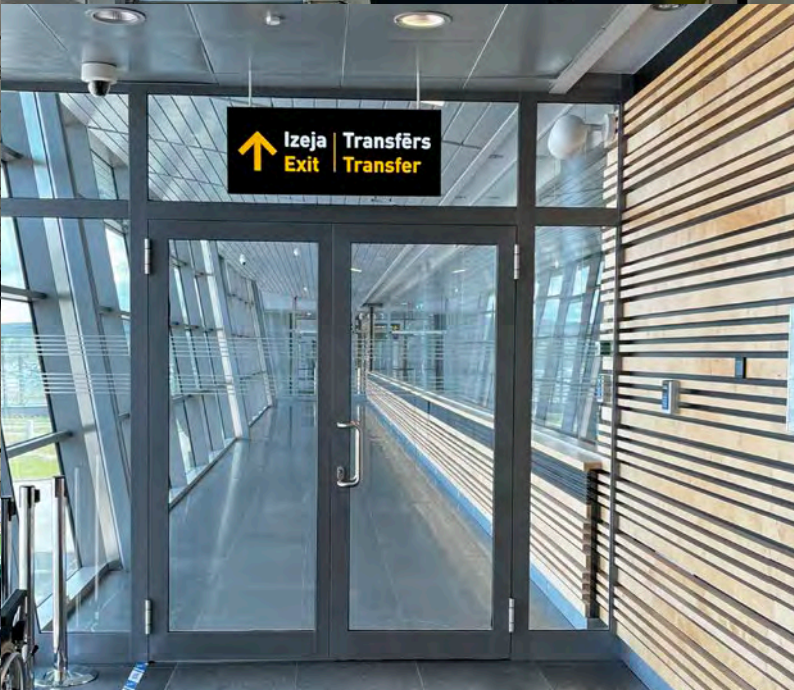

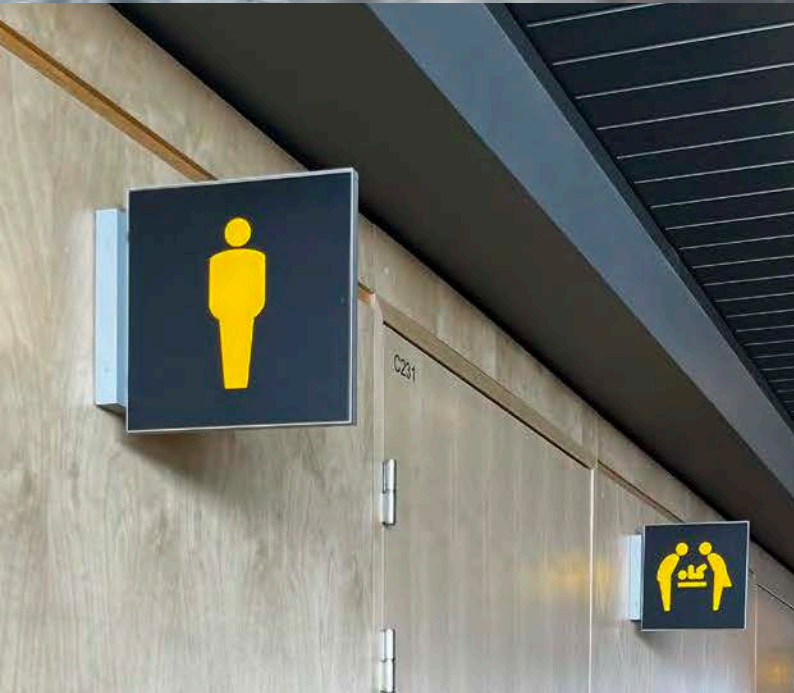

lightweight

HIGH OR LOW CEILINGS

The light panels are mounted on slim, elegant brackets that are almost invisible.

FIXATION

The wayfinding signage system has several fixing options: portable stand, wall or ceiling mount.
